

EXECUTIVE SUMMARY | 2015 – 2018

Logistics Performance & Risk Analysis

On-time delivery, network risk, and operational priorities across the delivery network.

Executive KPI Overview

TOTAL REVENUE

36.78M

Total revenue across the period

TOTAL ORDERS

181K

Fulfilled shipments

ON-TIME DELIVERY

45.17%

Below the 50% target

AVG SHIPPING DELAY

1.62 days

Network-wide average

KEY TAKEAWAY

Operations show a clear performance gap: on-time delivery sits under 50%, with consistent delays across the network.

Global Logistics Compliance

- Map clusters separate efficient routes from regions that need immediate intervention.
- Node color signals delivery health across each region at a glance.

● High on-time delivery performance

● Critical delivery failures

City-Level Risk Matrix

PRIORITY FOCUS

- Cities in the top-right quadrant — high volume and high delay — carry the greatest financial and operational risk.
- Targeting these clusters delivers the biggest gains in overall delivery compliance.

Primary Drivers of Logistics Delays

- Performance varies widely across shipping modes, regions, and product categories.
- The primary bottleneck is **Standard Class** shipping, which drives the highest volume of late orders.

93,821 late orders traced through the delivery path

Operational Next Steps

1

Immediate Action

Audit Standard Class logistics partners operating in the top-right risk quadrant.

2

Optimization

Reallocate resources from high-performing categories to fix process gaps in the Fan Shop and Apparel departments.

3

Continuous Improvement

Use the automated dashboard for real-time delay tracking and quarterly performance reviews.
